SUMMARY

I am a results-driven I.T. Professional with a strong background in application development, systems integration, and process automation. With over two decades of experience delivering innovative solutions across government and enterprise sectors, I've had the privilege of supporting organizations such as NASA, Lockheed Martin, the U.S. Department of Homeland Security, Rio Tinto, Western Power, Perth Airport, and various West Australian government departments.

What sets me apart isn't just the code I write - it's the results I help deliver and relationships built along the way. I thrive on aligning technology with business outcomes, using creativity and critical thinking to build systems that are not only functional but meaningful. Spearheaded innovative projects, notably automating processes to slash ETL times from 4 days to 2 hours. I've been recognized for exceptional problem-solving skills and a commitment to excellence, evidenced by two Nintex Partner of the Year awards, Microsoft Case Studies, and Letters of Commendation from the U.S. Government.

ACCOMPLISHMENTS

- Multiple projects that have been highlighted in Microsoft Case Studies.
- Built systems honored with Nintex Partner of the Year (twice).
- I had the privilege to work on the Hubble Space Telescope Ground System! (yes, really!)
- I've developed mission-critical systems to help catch "the bad guys" in Australia & the USA.
- Received formal "Letters of Commendation" from U.S. government entities for my outstanding contributions.

SKILLS

- Desktop application development, Server application development, Web application development, Cloud Application Development, Code optimization, Solution Integration, Process Automation, Nintex, C#, .NET, SQL, Power Apps, Power Automate, PowerShell, JavaScript, TypeScript, CSS, PHP, SharePoint, Azure, Visual Studio, SQL Management Studio, WordPress, Adobe Photoshop, ShareGate, CloudFlare

EXPERIENCE

Senior Consultant, Technical Specialist
Insight Enterprises

03/2012 - current
Perth, Australia

Highly versatile Senior Consultant and Full-Stack Developer with extensive experience delivering end-to-end technical solutions across government and enterprise clients. Specialized in process automation, and full-stack application design and development. Key engagements include:

- **Department of Finance (WA):**
Developed **PowerApps forms and Power Automate workflows** to track and manage asbestos-containing materials across government assets—enabling improved safety compliance and asset transparency.

- **iPart (NSW):**
Created **proof-of-concept CoPilot Agents** to showcase AI-driven process automation capabilities and solve specific business use cases.
- **Department of Communities (WA):**
Delivered advanced **Nintex OnPrem, O365, and Automation Cloud** solutions—two of which were nominated for **Nintex Partner of the Year** (one won). Also developed SharePoint portals, automated deployments, and authored custom tools using **C# and PowerShell**.
- **INPEX:**
Led the **intranet redevelopment** under a tight deadline—designing modern, responsive pages using **Visual Studio and CSS/Sass**.
- **RAC:**
Designed and presented multiple **Nintex-based automation POCs**, helping modernize internal processes across SharePoint environments.
- **Perth Airport:**
Executed a **SharePoint data migration** using **PowerShell and ShareGate**, successfully moving content across domains and infrastructure.
- **Western Power:**
Developed a **cross-platform mobile application** for field power operations (Android/iOS) using **C#, Azure, NoSQL, Knockout.js/Durandal**, and integrated APIs.
- **Department of Housing (WA):**
Reengineered the organization's ETL processes—replacing legacy systems with a **custom C# framework**, reducing data processing from **4 days to 2 hours**.

Senior Software Engineer

06/2002 - 02/2012

UNISYS

Springfield Virginia, USA and Perth, Australia

- American clients: U.S. Customs & Border Protection, Department of Homeland Security
- Australian clients: Western Australia's Public Trustee, Department of the Attorney General, Department of Justice
- Scoped out project designs, requirements, outlined UAT and implementation plans, developed and implemented multiple solutions using .Net, C#, SQL, Java based technologies.
- Held a U.S. government security clearance.

Other Experience

06/1994 - 05/2002

Maryland and Virginia, USA

- Companies and organizations worked for include NASA, Lockheed Martin, TRW, UUNET

EDUCATION

Bachelor of Science, Computer Science, Virginia Tech University

CERTIFICATIONS

- Nintex Process Automation Expert Workflow Cloud, O365, and SharePoint OnPrem
- Microsoft for Azure Solutions, Security/Compliance/Identity, SQL, .Net, JavaScript & CSS
- Microsoft Transcript available at: <https://learn.microsoft.com/en-us/users/davidlozinski-2811/transcript/71krmfg303mn9ll?tab=credentials-tab>

CLEARANCES

- Australian National Police Certificate
- Previously held a U.S. Customs and Border Protection Background Investigation Clearance
